Success Story

Recently, we had a retroactive pay adjustment processed for one of our units. One individual had his action processed twice, making him receiving more money that he should. The error was not caught by the HRO right away, but the employee's supervisor, using the Self Service Application of My Workplace found it the next day when he was reviewing his employee's personnel action. This error was fixed in a timely manner thus relieving the employee from any debt he may of incurred due to the overpayment.

This is just one of many successes that could be achieved if all Supervisors and Technicians used the Self Service Applications.
